New Category
September 10, 2018**

4th Edition of
**INDIA INDUSTRY
WATER
CONCLAVE**

6th Edition of FICCI
WATER AWARDS

November 2, 2018

FICCI Federation House, Tansen Marg, New Delhi

Urban Wastewater Management

In urban areas water resources are under significant pressure due to high water demand and complex consumption patterns within small but highly-densely populated areas. This is both inefficient and energy intensive. Therefore, adopting practices such as reuse of treated wastewater and its management would be of immense significance in achieving water security in urban spaces.

Eligibility

Private Wastewater Treatment Technology and Service Providers, Urban Local Bodies (ULBs), Jal Boards, Water Utilities.
